Here is the Bug Report, when the Demo Account Creation Page allows adding users with the same email.

Category	Label	Value
	ID number	#001
	Name	User Account
	Reporter	Mariam Avetisyan
	Submit Date	08/17/23
Bug overview	Summary	After login managing URL access to another user private account
	URL	https://login.com
	Screenshot	screenshots folder
Environment	Platform	Windows 11 Home
	Operating System	22H2, 22621.2134
	Browser	Chrome: 116.0.5845.97 (Official Build) (64-bit) Firefox: 116.0.2 (Official Build) (64-bit) Microsoft Edge: 115.0.1901.203 (Official build) (64-bit)
Bug details	Preconditions	Email data: mariamavetisyan22@gmail.com Password: aA!1234567
	Steps to reproduce	1. Check if the page loads without any errors 2. Fill in the fields with valid data (the email (username) and password) 3. Click on [Login] button 4. In the URL change the your credentials (which are visible) with another known users credentials
	Expected result	After login the URL should include only the endpoint and the redirected page and in cookies should exist only access tokens and by any change or manage log out from the account.
	Actual result	After login the URL contains in visible way the user credentials so when you change it with another existing one you get access to that private account.
